¹ With the current patches and service packs.

² Using MS Windows Vista as an operating system requires a main memory of at least 2 GB.

³ Example is for a small Across installation. For medium/large-sized installations, please consult us.

⁴ For project management with crossWeb, a higher configuration is required.

⁵ For the deployment of crossAnalytics reporting module, SQL Server Reporting Services must be installed.

⁶ In order to guarantee that Across operates correctly, the MS Internet Information Services (IIS) have to be installed.

⁷ For the deployment of the MS Windows Server 2008 operating system, the compatibility mode must be activated for the IIS 6.

⁸ For using crossMining and crossWeb, Microsoft .NET version 3.5 must be installed.

- All system requirements of the respective operating systems must be met at all installations.
- For the Across Language Server, a 100 Mbit network is required.
